Propaganda Poster USSR United Nation Anti Semitic Conspiracy Theory USA Christian Nationalist Crusade. Original vintage anti-Soviet and anti-Semitic conspiracy theory propaganda poster - Sensational fact! Russian Arms Banner Bears Shocking Similarity To United Nations Flag! - featuring a side by side illustration of the United Nations Flag and the Russian Arms Banner with the text below reads: Some days before this went to press an intelligent patriot put into our hands a copy of the so-called Russian Constitution. Imagine the shock when we came to the picture of the Russian Arms Banner in other words, the flag under which the Russians fight. As we observed it, its similarity in design and motif to the United Nations Flag was too great to ignore. Therefore, we have reproduced a copy of each flag in order that the reader may draw his own conclusions. Today American boys are being asked to die under the U. N. flag. which apparently was copied from the Arms

Banner of Soviet Russia. Do not confuse the Arms Banner with the Russian national emblem, which is the hammer and sickle with a red background. We have a copy of the Russian Constitution and on the front of the Russian Constitution is just one picture and that is the picture of the Arms Banner portrayed above. What goes on here? What super conspiracy is responsible for this deadly situation? Oh, what saps some of our American leaders have been - and if not saps, traitors! NOTE: While the Russian Arms Banner and the United Nations flag bear this striking similarity in design, the reader must not forget that the Jew Palestine flag is the same color as the U. N. flag. So it turns out that our Korean heroes are being asked to die under the Jew colors of a flag copied from the Russian Arms Banner. Propaganda Poster USA Stronghold Of Reaction And Aggression USSR. Original vintage Soviet propaganda poster - USA - Stronghold of reaction and aggression. - featuring an illustration of the Statue of Liberty with rockets guns and gallows, illustration of a soldier, dislocation of American soldiers, the text on the poster reads - American billionaires have opened a particularly tragic page in the bloody history of imperialism. Lenin. The USA is the largest country of capitalism. Territory - 9.4 million square meters, population - 202 million people. 2.9 million people live in the colonial possessions of the United States. The events of the last decade have revealed with even greater force the image of US imperialism as a world exploiter and qendarme, an implacable enemy of the liberation movements. The USA is a state of sharp social contrasts,

monstrous property and political inequality, and racism. While 2% of the population owns half of the national wealth, 35 million people live in poverty and 11.5 million go hungry. 25 million blacks live in conditions of racial inequality and are persecuted. Despite the fact that imperialism as a world system is stronger, it remains a serious and dangerous adversary. The aggressiveness of the main imperialist power, the United States, has intensified. An army of 500,000 is waging a bandit war in Vietnam. Over the past 5 years, US military spending has amounted to almost \$350 billion, i.e. 20% more than during all the years of the Second World War. In today's world, the efforts of imperialist states, primarily the United States, have created an ominous web of regional military blocs and alliances that are hotbeds of tension and hotbeds of military conflicts. 429 large and almost 3,000 small bases and strongholds have been set up by the Pentagon on foreign territories. About 1.5 million US troops are stationed in over 100 states. The United States and its partners in military blocs in the post-war period organized and provoked more than 200 military conflicts and local wars aimed at suppressing the revolutionary and national liberation movement. Soviet soldiers must be especially vigilant against the intrigues of imperialism, constantly maintain high combat readiness in order to crush any aggressor. The web spreads across the Atlantic ocean wrapping Uncle Sam, France, Greece, Italy, and spreading into the Middle East. German Eagle sits on the rock in the foreground, with German U-boats cutting the strands of the web. The Entente Cordiale comprised a series of agreements signed on 8 April 1904 between the United Kingdom and the French Republic which saw a significant improvement in Anglo-French relations. The most important feature of the agreement was the mutual recognition that Britain was in full control of Egypt and likewise France of Morocco, with the proviso that France's eventual dispositions for Morocco include reasonable allowance for Spain's interests there. At the same time, Britain ceded the Los Islands (off French Guinea) to France, defined the frontier of Nigeria in France's favour, and agreed to French control of the upper Gambia valley; while France renounced its exclusive right to certain fisheries off Newfoundland. Furthermore, French and British proposed zones of influence in Siam (Thailand), which was eventually decided not to be colonised, were outlined, with the eastern territories, adjacent to French Indochina, becoming a proposed French zone, and the western, adjacent to Burmese Tenasserim, a proposed British zone. Arrangements were also made to allay the rivalry between British and French colonists in the New Hebrides.
